

MISCELLANEOUS.

THE PADDY RUN
COAL COMPANY.

OF
SHERKSHINSKY, PENNSYLVANIA.

CAPITAL \$100,000.

JOHN M. STACKHOUSE, President.

CHAS. A. DROBE, Secretary and Treasurer.

DIRECTORS:

John M. Stackhouse, N. L. Campbell,

Chas. A. Drobe, Cyrus Steinhilber,

A. McDowell,

OFFICE:

MAIN STREET, SHERKSHINSKY, PA.

The lands held by this company, consist of

FOUR HUNDRED AND FORTY-

ONE ACRES.

and sixty-four acres of land, situated in

the counties of Wilkes-Barre, Luzerne, and

Dauphin, in the western part of the Great Northern

or Wyoming Coal Field.

A very careful and thorough examination

recently made has proven that the above

lands are of the highest quality of a vast amount

of the very best quality of anthracite coal, having

every facility that could be desired for transpor-

tation in all directions. The above tract is

crossed by a good road, and also directly in

front, and joining the Lehigh and the Bloomsburg

railroads, and the Wyoming canal, thus forming

the very best advantage of a carrying road, and

convenient supply of coal and fuel very val-

uable without expense to the company.

The measurement of the different beds of seams

already developed was carefully obtained and

added together—the thickness of these seams,

including the celebrated "Black Ash," "Black Mountain,"

or "Grand Tunnel" vein, is thirty-one and

half feet, giving a very large amount of the best

quality of coal.

The location is such that all the veins may be

cut and worked to the greatest possible advantage

above water level, and at much less expense than

can be done from collieries operating below water

level.

The coal can be brought to the surface through

drifts or tunnels which drain the water from the

mines and saves the hoisting of the coal, so the

facility of these lands for doing mining is in-

estimable. Very lately the "Grand Tunnel,"

or "Red Ash" vein has been opened, and is now

producing a fine quality of coal, and has been

added to the productive capacity.

The breaker now in operation is capable of preparing

from 150 to 200 tons per day. The surface contains

an abundant supply of coal and fuel very val-

uable for mining purposes, which gives the tract

the advantage of mine other coal lands. The

fact that abundant quantities of coal and fuel are

being taken up by heavy capitalists and large

merchants, shows that they must be in great

demand, and that the market value, while with the

minerals and constantly increasing demand for

this coal, and the Railroad and North Branch

road, running to the mouth of the mine, through

the great iron-making centers of Pennsylvania,

namely, Pottsville, Harrisburg, Middletown,

Market, and Columbia, to the water at a point

of great importance, and the fact that the

coal can be brought to the surface through

drifts or tunnels which drain the water from the

mines and saves the hoisting of the coal, so the

facility of these lands for doing mining is in-

estimable. Very lately the "Grand Tunnel,"

or "Red Ash" vein has been opened, and is now

producing a fine quality of coal, and has been

added to the productive capacity.

The breaker now in operation is capable of preparing

from 150 to 200 tons per day. The surface contains

THE COLUMBIAN.

FOR THE COLUMBIAN.

"HORAS NON NUMERO NISI SERENAS"

Meta non ultra diu delectat.

By SARAH BOND.

So fresh we, Lord, through each event of life,

A colorless, thin, and white, we keep,

And, holding not the daily stream and strife,

That life like the river, flows, and flows, and flows,

Still may we note the sunbeams, as they fall,

And like the dew that falls, and falls, and falls,

Our motto, through all change, shall be, "Be still."

And the fairest years of our life shall be,

So, let us gather up the sweets of earth,

To fill the record of each passing day.

Not in our nightly reveries by the heart,

Remember crosses that have bloomed our way.

The loveliest flower of earth is seldom found

Without its imperfections, here or there.

And the fairest years of our life shall be,

So, let us gather up the sweets of earth,

To fill the record of each passing day.

Not in our nightly reveries by the heart,

Remember crosses that have bloomed our way.

The loveliest flower of earth is seldom found

Without its imperfections, here or there.

And the fairest years of our life shall be,

So, let us gather up the sweets of earth,

To fill the record of each passing day.

Not in our nightly reveries by the heart,

Remember crosses that have bloomed our way.

The loveliest flower of earth is seldom found

Without its imperfections, here or there.

And the fairest years of our life shall be,

So, let us gather up the sweets of earth,

To fill the record of each passing day.

Not in our nightly reveries by the heart,

Remember crosses that have bloomed our way.
